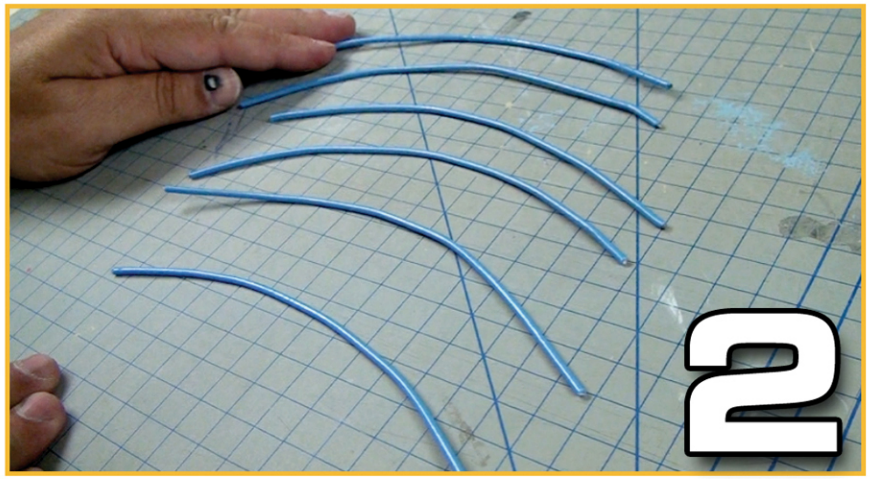
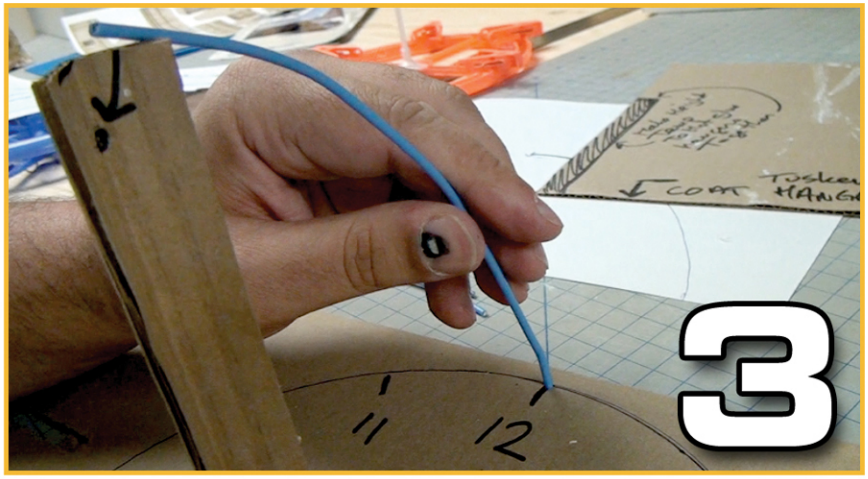
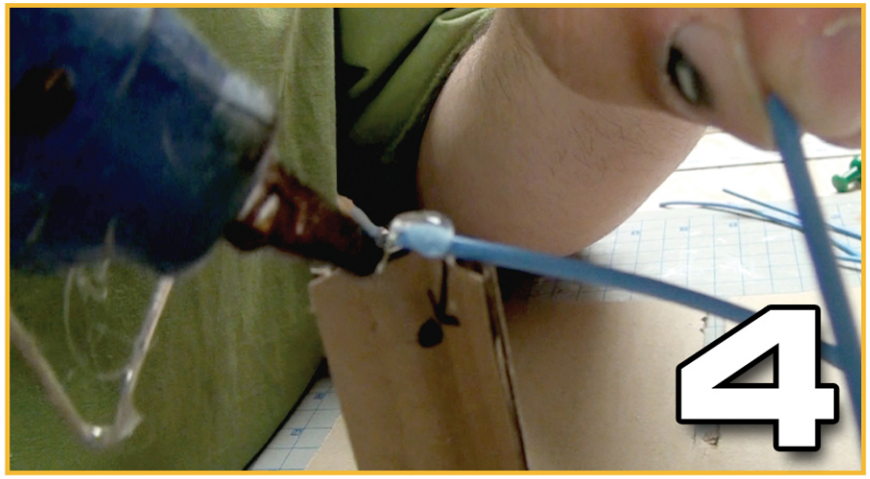
Take a piece of COAT HANGAR and place it on the TEMPLATE Slowly BEND IT following the shape of the line.



Continue BENDING wires until you have 6 pieces that look like this photo. We are ready to make our skeleton.



Start the FIRST WIRE at 12 O'clock on the CARDBOARD clock. Put one end INSIDE the HOLE on the base and LEAN the wire against the CENTER POST.



Take your HOT GLUE and put a DAB on TOP of the FIRST WIRE

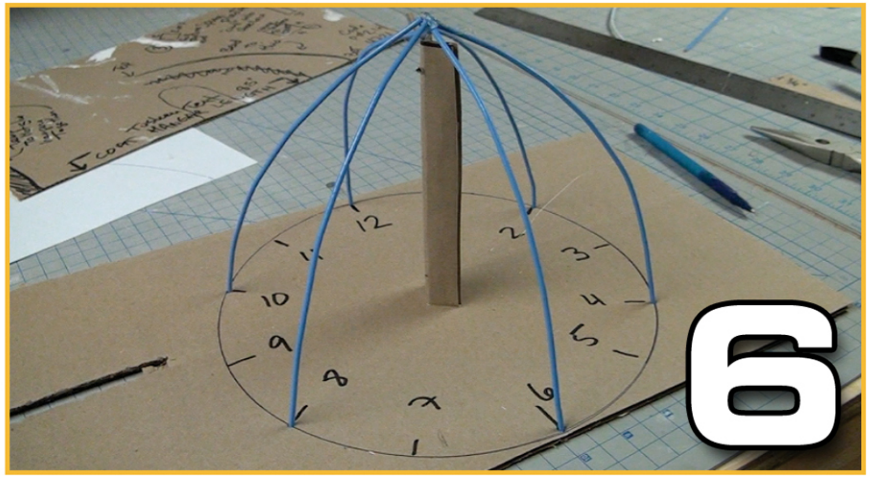
LEAN the SECOND WIRE on TOP of the GLUE while it is HOT. Wait a little before putting ANOTHER DAB and then the 3rd wire and so on until ALL 6 are in place.



You need to put the wires on the clock at 12 - 2 - 4 - 6 - 8 and 10 Your SKELETON should look like this when you are done.

Grab a piece of PLASTER BANDAGE and DIP IT in the WATER. SLOWLY and CAREFULLY DRAPE IT over the WIRES. You want it to DROOP a little in between the wires. NOT SUPER TIGHT.

Continue DRAPING your plaster until the ENTIRE structure is covered.

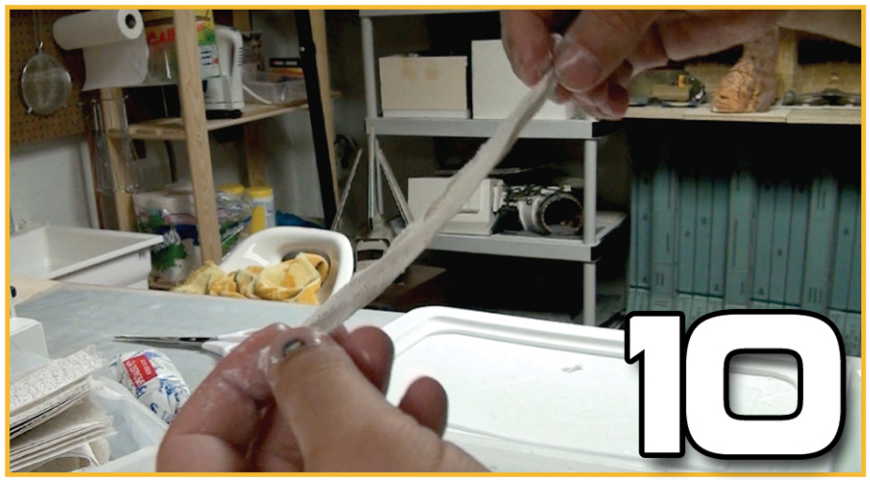
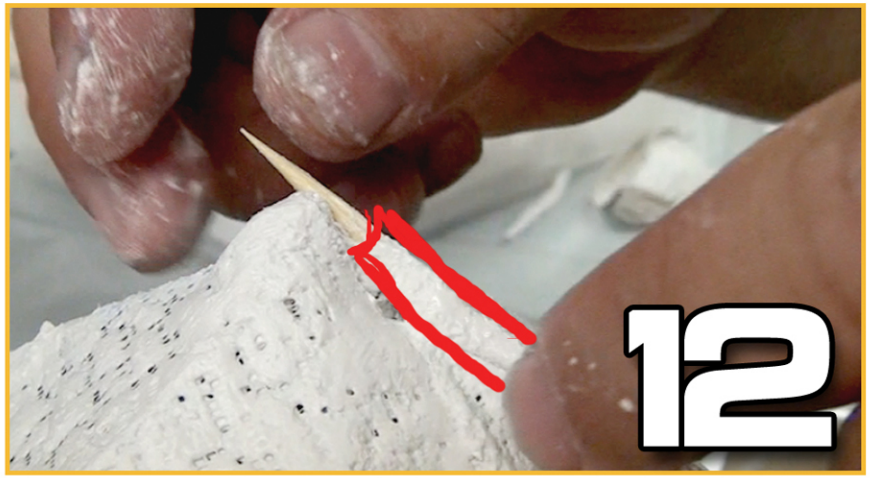
You need to THICKEN the SPINES a little, so grab some LONG THIN 8" STRIPS.



You need to DIP your STRIP into water and TWIRL IT a little to make it look like a SHOE LACE.

FIND a SPINE (where the WIRE is) and START at the TOP going all the way down while PINCHING the strip to make it look like a THICK SHOELACE.



PLACE a SKEWER TIP UNDERNEATH the Shoelace Strip to simulate that the shoe lace is actually the wood stick causing the BUMP along the spine.

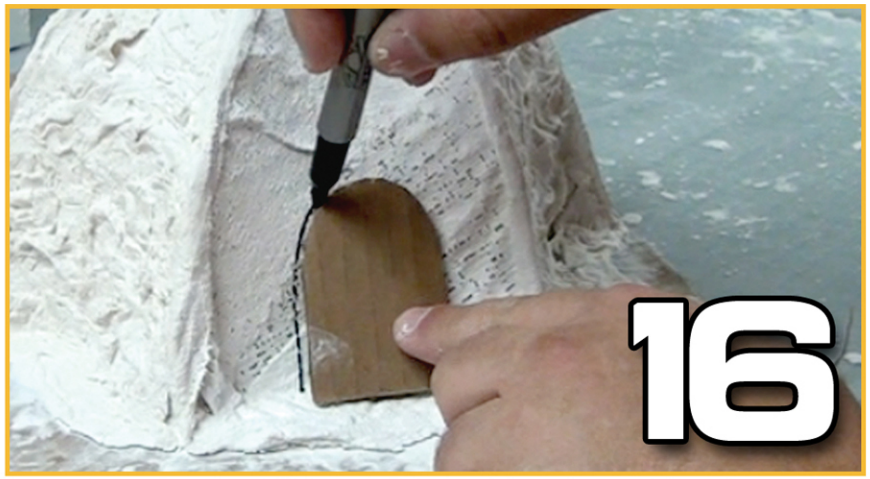
Continue the shoelace technique for EVERY WIRE SPINE. And REMEMBER to INSERT your SKEWER TIPS under each of your Plaster shoelaces. The TOP of the Hut should look like this.

Now you need to TEXTURE the HUT. Take TINY 2x2" Pieces of Plaster Bandages, DIP and Apply IN BETWEEN the Shoelaces ONLY. Crumple or BUNCH the bandage together...

...You want it to look like USED SOGGY WET KLEENEX - LOL. See the difference between the LEFT - ONLY BANDAGES and the RIGHT which has the TEXTURE.



BEFORE you TEXTURE the LAST PANEL, Take your HUT DOOR TEMPLATE and TRACE with a Felt Marker.

Carefully CUT ALONG THE LINE with your SCISSORS. This can be TRICKY if the plaster isn't hard yet.or, if you have more then ONE layer to cut.

Once the DOOR is OPEN, You can CONTINUE to apply the 2" pieces to give that WET KLEENEX effect. You can TUCK the pieces that stick out of the TENT INSIDE the door walls.

Grab a SPONGE and some WATERED DOWN Tan Paint and DRIP it on the Hut causing the plaster to ABSORB it and giving it some color variant.

Last Step is to DRY BRUSH some DARK BROWN PAINT along the RIDGES to give it a DIRTY LOOK. DO NOT cover the ENTIRE SURFACE. Just spread out some Hi Lite/Dark lites.
