2 HOUSE #2 - LARGE YOUNGLING

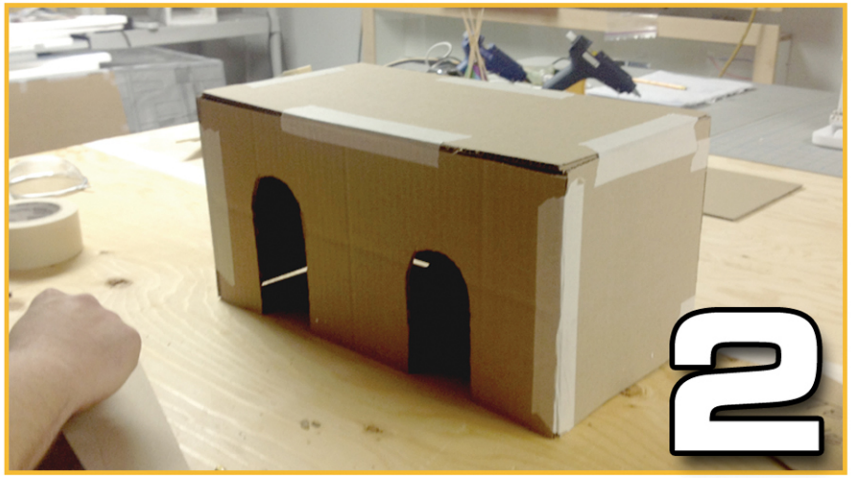
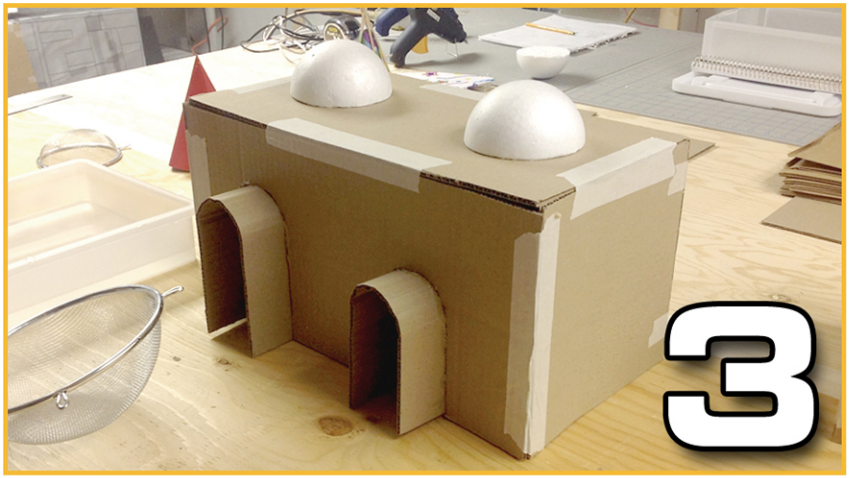
Assemble your 8"x16" BOX with MASKING TAPE.



Using the DOOR TEMPLATE - TRACE a door OR 2 wherever you feel looks best for YOUR house. Then use SCISSORS to CUT OUT the door shape.



Next HOT GLUE a STYROFOAM BALL or 2 to the ROOF of your house. You don't HAVE to do it, remember that YOU are in charge of your house. You can also add DOOR EXTENSIONS.

Now DIP a PLASTER BANDAGE into your TUB of water. Make sure to NOT PUT WET HANDS into the BIG PLASTER BOX. You will RISK CONTAMINATION and HARDEN ALL the bandages

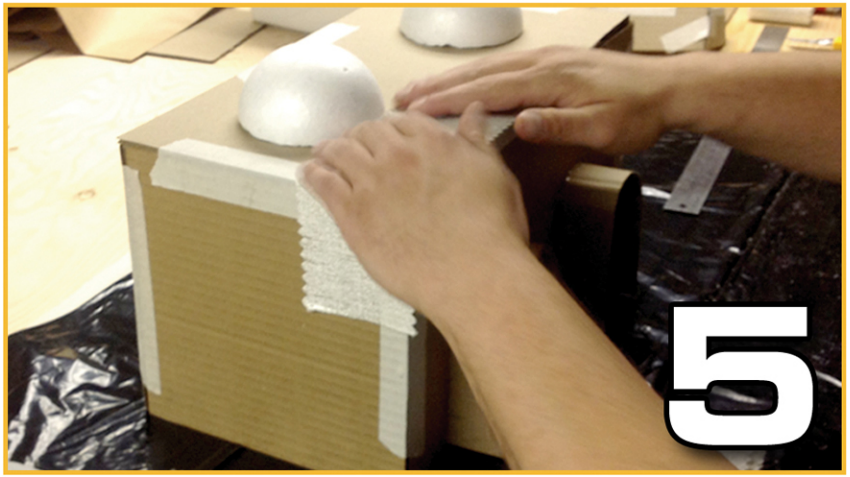
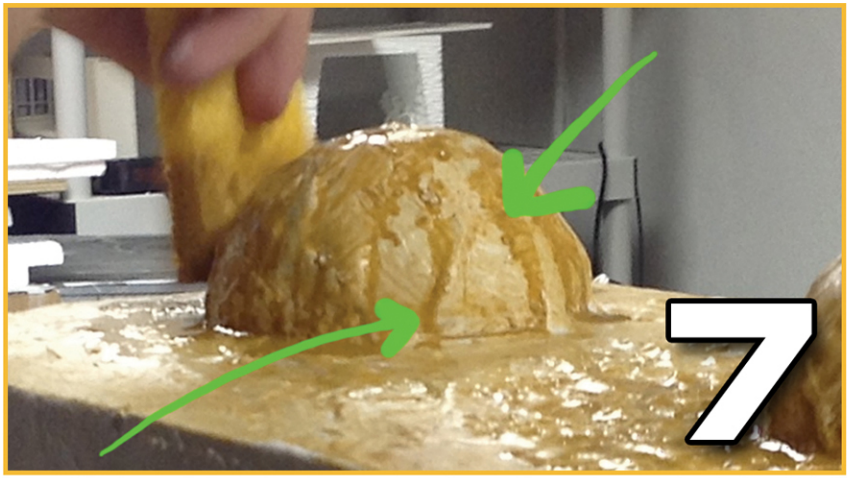
2 HOUSE #2 - LARGE YOUNGLING



Carefully PLACE your BANDAGE on top of your BOX. You want to COVER the ENTIRE SURFACE, so REPEAT as NEEDED. After EACH BANDAGE, RUB IT to remove as many holes as possible.

When you have covered the ENTIRE SURFACE, you are READY for PAINTING.



USE a SPONGE to SQUEEZE the paint on the plaster. Because it is watered down, the paint will get ABSORBED into the house. With EVERY SQUEEZE it will appear to CRY and add texture.

Once the house is PAINTED, you can place it on the DRYING TABLES and then after an hour or so, come see a STAFF and we can place it on the street together.
